## Summary

---

Software engineer with **4+ years of experience** in Python backend development, web application development, and robotic process automation (RPA). Proficient in Django, Django REST Framework, FastAPI, and Odoo, with solid expertise in CockroachDB, PostgreSQL, Redis, and Celery. Experienced in delivering end-to-end projects independently for international clients and within cross-functional Agile teams. Committed to building scalable, maintainable systems and automating complex business workflows to drive measurable impact.

## Experience

---

### Beinex Consultancy

Jan 2025 – Mar 2026

*Senior Software Engineer*

*Kochi, Kerala*

- Developed and maintained scalable Python Django and DRF backend services for Aurex, an enterprise Governance, Risk & Compliance (GRC) platform used by large organizations.
- Built and optimized RESTful APIs for high-performance data exchange; integrated Redis and Celery for asynchronous task processing and background job scheduling.
- Integrated Redis and Celery for asynchronous task processing and background job scheduling, improving system throughput.
- Conducted code reviews, enforced clean code standards, authored technical documentation, and drove Agile sprint planning and delivery.
- Worked with Docker, Nginx, and CI/CD pipelines (Jenkins) for deployment and infrastructure management.

### Beinex Consultancy

May 2024 – Jan 2025

*Software Engineer*

*Kochi, Kerala*

- Developed backend features using Django and FastAPI for data-intensive enterprise applications with a focus on performance and scalability.
- Designed and implemented efficient API contracts and data pipelines in collaboration with frontend and data science teams.
- Worked on CockroachDB and PostgreSQL database design, query optimization, and ensuring data integrity across services.
- Participated in Agile ceremonies including sprint planning, daily stand-ups, and retrospectives.

### Freelance

Jun 2023 – May 2024

*Full Stack Developer*

*Remote*

- Delivered FQ International Job Portal – a Django/DRF recruitment platform with role-based access, job listings, candidate profiles, application tracking, and email notifications.
- Built OrderSelf, a full-featured online ordering system for a German client using Django REST backend with product catalogue, cart management, and user authentication.
- Implemented Standmark, a custom Odoo accounting solution with modules for invoicing, financial reporting, inventory tracking, and vendor management.
- Independently managed full project lifecycle: requirement gathering, architecture design, development, deployment, and client communication.

### JIFFY.ai

Nov 2022 – Apr 2023

*RPA Developer*

*Thiruvananthapuram, Kerala*

- Automated a complex end-to-end invoice processing system using JIFFY.ai, reducing processing errors and operational costs by 50%.
- Built a web-based real-time analytics dashboard for monitoring automated workflow performance and reporting on business KPIs.
- Optimized enterprise RPA processes, driving significant efficiency improvements across client business operations.

### Saasvaap Techies Pvt Ltd

Aug 2022 – Apr 2023

*Software Engineer*

*Thiruvananthapuram, Kerala*

- Developed dynamic web applications using Python Django and Odoo, enhancing backend capabilities for business-critical workflows.
- Built and maintained RESTful APIs; managed MySQL database design, relationships, and query optimization.
- Collaborated in Agile sprints, contributed to code reviews, and maintained high standards of code quality.

## Projects

---

### Aurex – GRC Platform | *Beinex*

- An enterprise-grade Governance, Risk, Compliance, and Analytics (GRC) platform integrating Continuous Audit, Audit Analytics, Audit Management, and Risk Management.
- Includes a unified Digital Assurance Ecosystem with Generative AI capabilities, available as a cloud-based SaaS offering or configurable on-premises deployment.

### FQ International Job Portal | *Freelance*

- A full-featured recruitment platform built with Django and Django REST Framework for an international staffing client.
- Supports employer job postings, candidate profile management, role-based access control, application tracking, and automated email notification workflows.

### OrderSelf – Online Ordering System | *Freelance*

- A web-based ordering platform developed for a German client, enabling customers to browse, place, and track orders.
- Built on a Django REST backend with product catalogue, cart management, order tracking, and user authentication modules.

### Invoice Processing Automation | *JIFFY.ai*

- An RPA solution automating the end-to-end invoice processing workflow, cutting errors and costs by 50%. Includes a real-time analytics dashboard for KPI monitoring.

## Technical Skills

---

**Programming Languages:** Python, JavaScript, SQL

**Frameworks:** Django, Django REST Framework (DRF), FastAPI, Flask, Odoo

**Databases:** MySQL, PostgreSQL, SQLite, CockroachDB, Redis

**DevOps & Cloud:** Docker, Nginx, AWS, Jenkins, CI/CD Pipelines

**Task Queue & Caching:** Celery, Redis

**RPA & Automation:** JIFFY.ai, Enterprise Process Automation, Workflow Optimization

**Version Control:** Git, GitHub, GitLab

**AI & Emerging Tech:** Generative AI, LLM integration, AI-assisted development

## Education

---

### Packpeer Academy

**Jul 2020 – Jan 2021**

*Intern*

*Kerala, India*

- Contributed to community-driven technology learning initiatives and open collaborative projects.
- Built foundational skills in Python, web development, and software engineering best practices.
- Created 2 real-time projects: an e-commerce platform and a doctor booking system.

### SNMHSS

**2019**

*Plus Two (Higher Secondary)*

*Kerala*

## Certifications & Awards

---

- **Best Employee Certificate** – JIFFY.ai (2023)
- **Python Full Stack Development** – SPS, School of Practical Studies, Kochi (2020)
